

STATEMENT OF PURPOSE

RS23527

This legislation will allow the Oil and Gas Conservation Commission to be exempted from the contested case provisions of the Administrative Procedures Act, and will allow the commission to adopt administrative procedures that were in place prior to July 1, 1993, governing the oil and gas program. This change will align the Oil and Gas Conservation Commission with the current practice of the Land Board which provides for administrative rules which are better suited to the practices and operations of the oil and gas program.

FISCAL NOTE

There is no fiscal impact from this legislation.
